SUMMARY

Director-level SRE and Cloud Operations leader with over 10 years overseeing multi-region AWS and hybrid environments. Delivered AWS EKS clusters that raised uptime SLA from 98.5% to 99.95% and led global SRE teams to accelerate deployments while cutting cloud costs by 30%. Skilled in Terraform, Kubernetes, CI/CD pipelines, and defining SLIs/SLOs to enhance reliability and incident response.

EXPERIENCE

CVS Health | *SRE Leader*

Jan 2024 - Present

Strategic Leadership: Directed the SRE team supporting Google Cloud Platform (GCP) Data Services architecting hybrid solutions spanning AWS (EKS, EC2, CloudBees/Jenkins), Azure, and Snowflake to enhance platform reliability and scalability in a production environment, aligning operational strategies with long-term business objectives to enhance platform reliability, scalability, and performance. **Architected Data Solutions:** Played a pivotal role in architecting and driving data strategies across databases, data warehouses, and data lakes within cloud environments, ensuring alignment with enterprise data goals.

- **Implemented AWS EKS production clusters**** with advanced monitoring and observability, improving uptime SLA from 98.5% to 99.95%. **Cloud Adoption and Migration:** Led initiatives in cloud adoption and migration, enabling seamless onboarding of use cases across GCP. Collaborated on hybrid and multi-cloud architectures involving AWS, Azure, and Snowflake for data-driven solutions.
 - Enhanced DataOps Strategies:** Analyzed enterprise data landscapes to recommend and implement DataOps strategies, leveraging integration patterns like ETL/ELT, APIs, messaging, events, and caching to optimize workflows and data pipelines.
 - Operational Automation:** Partnered with cross-functional teams to develop and automate scalable data pipelines (ETL/ELT) using tools such as Informatica and Snaplogic, improving operational efficiency and reducing manual interventions.
 - Data Security and Compliance:** Strengthened data security and compliance across GCP ecosystems, ensuring alignment with enterprise policies and industry standards, including best practices for data governance and risk management.
 - Cloud-Native Architectures:** Designed and implemented cloud-agnostic architectures for new and migration use cases, including transitioning on-premises databases to GCP, Snowflake, and other modern data platforms.
 - Data Solutions:** Worked with AI/ML models, LLMs, VectorDBs, GraphDBs, and advanced data integration technologies to solve complex data problems and improve decision-making capabilities.
 - Continuous Integration & Deployment:** Streamlined CI/CD processes for data services, fostering a culture of continuous integration and operational excellence.
 - Monitoring and Optimization:** Implemented advanced monitoring systems for critical data pipelines using GCP tools like BigQuery, Composer, and Dataproc, improving system observability and performance.
 - Led retrospectives and DevOps maturity improvements,** standardizing automation practices and roadmap execution across multiple teams.
- Automated manual processes including unit testing, integration testing, and CI/CD pipelines (CloudBees/Jenkins, Kubernetes, Terraform), reducing deployment time by 40%.
- Partnered with security teams to strengthen governance, compliance, and resilience across multi-cloud data platforms.
- Quantified results: reduced critical incident response times by 35%, cut infrastructure costs by 20% through optimization.
- Defined and implemented SLO/SLI frameworks and error budgets for mission-critical services,** reducing incident recurrence by 30%.

Southern New Hampshire University | *Head of DevOps & SRE*

Mar 2021 - Jan 2024

Crafted and communicated a comprehensive technical vision and strategy for the full-stack development of SNHU's education platform, ensuring alignment with the university's mission and the Innovation Department's objectives.

Conducted continuous monitoring of industry trends and emerging technologies to maintain the platform's technological relevance and competitiveness, leading to the adoption of cutting-edge solutions that enhanced user experience and operational efficiency.

- Led and oversaw the full stack development team,** ensuring efficient and cohesive development of both frontend and backend components, resulting in improved project delivery times and enhanced system reliability
- Ensured the application was scalable, responsive, and provided an excellent user experience for both educators and students,** leading to increased user satisfaction and engagement
- Fostered a DevOps culture of collaboration, automation, and continuous feedback among developers, operations, and other stakeholders,** which improved team communication and reduced deployment times
- Established EKS-based environments with containerized workloads across multiple AWS regions,** enabling elastic scaling and high availability.

Deltelk | *Director of Cloud Application Provisioning & Delivery Implementation*

Sep 2019 - Mar 2021

Experienced Director specializing in cloud application provisioning and delivery implementation within the enterprise software sector. Proven track record in leading successful deployments of Deltelk Vision, Vantagepoint, and Ajera, driving operational excellence, and enhancing client satisfaction through strategic leadership and innovative solutions.

- Led Cross-Functional Teams: Directed and managed a diverse team of cloud architects, project managers, and implementation specialists to successfully deploy Deltek Vision, Vantagepoint, and Ajera, resulting in a 30% increase in client satisfaction and streamlined project delivery.
- Strategic Cloud Provisioning & Implementation: Developed and executed comprehensive cloud provisioning strategies using AWS, Azure, and Google Cloud Platform, ensuring scalable, secure, and high-performance environments while implementing automation tools that reduced deployment time by 25%.
- Spearheaded initiatives to enhance operational efficiency and reduce costs through process optimization and automation, providing expert product management support and exceeding client expectations through continuous improvement and innovation
- Designed cloud provisioning strategies using AWS, Azure, and GCP, with emphasis on Kubernetes/EKS orchestration. Led cross-functional DevOps teams, incorporating automation into CI/CD workflows and cloud-native application delivery.
- Drove continuous improvement initiatives, refining CI/CD workflows and operational processes to boost deployment frequency by 40%.

UKG (Ultimate Kronos Group) | *Senior Manager Cloud Delivery*

Mar 2015 - 2019

Started position as sole contributor, which quickly transitioned to building up robust, global cloud-implementation team of 30-35 who complete 700 implementations annually for UKG's clients. Collaborate cross-functionally to establish roadmaps and goals. Partnered with Google to complete full implementation and build customized frontend interfaces based on user access and needs. Architected integrated software following UKG's merger with UltiPro.

- Saved more than \$200M in first year of sunseting old, stagnant application and transitioning to Dimensions, which was cloud-accessible, scalable, and streamlined.
- Led operational transformation migrating to Dimensions, a cloud SaaS platform, leveraging microservices and serverless architectures to ensure scalable, resilient service delivery.

Global Service Export Technologies | *Latin America Expansion Consultant*

Jan 2012 - May 2018

Launched consultancy to support World Wide Technology in its efforts to expand into LATAM. Travelled extensively across region to identify areas for expansion, meet local clients, and secure in-country vendors to fulfill on projects. Established SOPs focused on regulatory compliance, including managing taxes and required certifications. Oversaw P&L, AR, and AP. Partnered with attorneys to review contracts and manage risks.

- Successfully expanded brand awareness into LATAM and secured new business, including lucrative contracts with Apple and IBM in Central and South America, as a result of efforts.
- Realized a seven-figure profit by selling the consultancy to World Wide Technology after completing the contract

World Wide Technology | *Sr Director Of Development cloud*

Mar 2006 - Mar 2015

- Architected and operated multi-region AWS platform for high availability, applying distributed systems design principles to support global customer-facing SaaS applications.
- Established cloud-cost governance processes using AWS Cost Explorer and Azure Cost Management, leading to measurable cost savings and improved budgeting visibility
- Implemented a client-management dashboard using full-stack development and AWS services, giving real-time project visibility and improving stakeholder communication
- Architected end-to-end solutions across AWS, Azure, and GCP using an event-driven microservices model, which accelerated feature delivery and reduced system downtime
- Defined and evaluated architecture standards, selecting optimal alternatives to improve application design. Conducted quality assessments during development and delivery phases, and performed impact analysis for technology changes. Communicated requirements with internal business units and supplier technical teams for the Grid Segregation Project. Mapped the program's full architecture and highlighted business impacts to stakeholders

EDUCATION

Southern New Hampshire University

Master Business Administration, Information Technology Management (GPA: 3.9)

Manchester NH

Southern New Hampshire University

Master Library & Information Science, Information Technology (GPA: 3.9)

Manchester NH

Southern New Hampshire University

Bachelor of Science, Robotics & Artificial Intelligence (GPA: 3.9)

Manchester NH

Southern New Hampshire University

Bachelor of Science, STEM Science (GPA: 3.9)

Manchester NH

University of Massachusetts

Bachelor of Applied Science, Electrical, Electronic and Communications Engineering Technology (GPA: 4.0)

lowell MA

SKILLS

- **Languages & Communication:** English, Portuguese, Spanish, Italian
- **Programming Languages & Frameworks:** Python, R Programming, SQL, REST APIs
- **Data & Analytics:** Data Science, Data Analysis, Data Engineering, Machine Learning, MLOps, Big Data, Business Intelligence, Data Pipelines
- **Cloud & Infrastructure:** Cloud Computing, AWS, GCP, Azure, Cloud Security, Cloud Platforms: AWS (EKS, EC2, CloudBees/Jenkins), GCP, Azure, Snowflake, Kubernetes (EKS), Terraform, Serverless Architectures, AWS Multi-region Architectures
- **DevOps & SRE:** DevOps, Site Reliability Engineering, Reliability Engineering: Monitoring & Observability (Grafana, Prometheus, Datadog), Incident Response, Retrospectives, SLO/SLI design, SLO/SLI Frameworks, CI/CD (CloudBees, Jenkins, GitHub Actions), Infrastructure as Code (Terraform)
- **Methodologies & Leadership:** Agile Methodology, Automation, Full Stack Development, Microservices, Application Development, Backend Development, Distributed Systems Design, Continuous Improvement, Operational Or Platform Transformations In SaaS, Product Management, Client Management, Roadmap Execution
